**(54) PLASTIC POUCH**

(57) Abstract:

**PROBLEM TO BE SOLVED:** To provide a plastic pouch wherein the pouch can be transported and preserved as it is without requiring a packaging material such as a separate outer bag or a paper container after contents are filled so that a packaging process with the packaging material can be omitted, a space required for transportation or storage can be reduced, and breakage of a flat crushed easy-to-unseal seal provided as a partition depending on the situation may not occur.

**SOLUTION:** In the plastic pouch 1 comprising a single layer or a plurality of layers formed with at least one small chamber 3 by extending at least a portion on a side wall of the pouch at a position below a summit of the pouch 2 outward for branching or the plastic pouch 1 having a folded part, the branched small chamber 3 or the folded part is fixed to a side wall of the pouch 2. The branched small chamber

3 and the pouch 2 are partitioned by a partition, while a flat crushed easy-to-unseal seal 4 is provided on at least a part of the partition.
